COMPANY OVERVIEW

Conservancy Stewardship Makes NYC Residents, Economy Healthier

As the lungs of one of the world's greatest cities, Central Park always had the potential to be one of the most beloved and visited destinations in the world. But it wasn't until the Central Park Conservancy dedicated itself to the Park's restoration and maintenance that the Park was able to reach its potential. As a result of our work, the Park welcomes more than 42 million visitors and contributes more than \$1 billion to New York City's economy every year.

The Central Park Effect

An independent study shows that Central Park is responsible for more than \$1 billion in annual economic activity and revenue for New York.

The Central Park Effect translates into more than 11,000 jobs—nearly 4,000 positions from economic activity as well as 7,200 jobs from real estate and other tax revenues.

Central Park is also a major source of added value to the City's most valuable real estate. As of 2014 The Central Park Effect added \$26.07 billion to the market value of properties near the Park—a premium equivalent to approximately 8 percent of the total value of all Manhattan real estate.

Quality of Life

Central Park is much more than a public green space around which many of New York's leading hotels, cultural institutions, and corporate headquarters are concentrated.

Central Park serves a large local community, with more than 1.5 million people living within a short walk or commute.

COMPANY OVERVIEW

FAQs

When and why was the Central Park Conservancy founded?

The Central Park Conservancy was founded in 1980 by a group of civic and philanthropic New Yorkers who were determined to end Central Park's dramatic decline of the 1970s and restore it as America's first and foremost major urban public park.

What is your relationship with the City of New York?

In 1980, the Central Park Conservancy was founded with the purpose of managing the restoration and maintenance of Central Park. Eighteen years later, in 1998, we signed a management agreement with the City of New York, formalizing their public-private partnership and our responsibilities.

What are you responsible for?

The Central Park Conservancy is responsible for raising the Park's annual operating budget, and is responsible for all aspects of the Park's stewardship, from day-to-day maintenance and operations to continued restoration and rebuilding projects. Additionally, the Conservancy operates the Park's visitor centers, provides public programs, and serves as a resource for other NYC parks and for public-private partnerships around the world.

More specifically, Conservancy crews:

CARE FOR

- 693 acres of land
- 150 acres of lakes and streams
- 18,000 trees
- hundreds of thousands of plants

MAINTAIN

- 9,000 benches
- 26 ballfields
- 21 playgrounds

PRESERVE

- 55 sculptures and monuments
- 45 arches and bridges

REMOVE ANNUALLY

- more than 2,000 tons of waste
- more than 70 tons of recyclables

We also operate five visitor centers throughout Central Park, where visitors can get information and resources to enhance their Park experience.

What have you accomplished during your 40-year stewardship of Central Park?

Since 1980, the Central Park Conservancy has overseen the investment of more than \$1 billion into Central Park, privately raising the vast majority of that amount from individuals, corporations, and foundations. We have developed and implemented a management and restoration plan for the 843-acre Park, created educational and enrichment programs for visitors, and shared our experience in urban park management with other parks throughout New York City and around the world to encourage accessible urban parkland wherever possible.

CORONAVIRUS RESPONSE

Central Park Conservancy staff is committed to caring for the Park and its visitors. We are diligently cleaning and conducting routine maintenance of landscapes, water bodies, and benches in order to keep the Park open as a place of solace—while practicing social distancing—during this crucial time.

The Conservancy believes allowing access to large open public spaces—while observing safe and appropriate social distancing—is essential to the health and wellness of all. Central Park remains open to the public and we welcome passive presence to those in need of a space to get some fresh air and solace amid this public health crisis.

- The Central Park lawns were opened early for passive use because we recognize that New Yorkers need this space now. Seasonal fencing was removed, and athletic fields were opened to further increase space for passive use.
- Relevant and appropriate signage has been placed around the Park in high-traffic spaces indicating best practices for social distancing and reminding Park-goers that congregating in groups is not permitted.
- All visitor centers and playgrounds are closed in alignment with recommendations from public health officials. Maps and other helpful information are available anytime on our website, centralparknyc.org, and we welcome visitors to connect with us on social media with any questions that may arise during your time in the Park.
- Sanitation and maintenance remain a focus of our Central Park operations team, who returned to the Park in full on Monday, April 27, 2020.
- The uninterrupted care of trees, lawns and flora in service to cleaner city air continues. Conservancy horticulturalists and landscape crews continue their work to ensure the health of the trees and plant life, allowing the Park to perform its function as a natural filter for our air.

LEADERSHIP

Elizabeth W. Smith, President & CEO

Elizabeth “Betsy” Smith was appointed in March 2018 as President & CEO of the Central Park Conservancy where she oversees strategic planning, park operations, capital programming, public programming, development, and marketing and communication strategies. With the Conservancy’s 40-year restoration of Central Park now largely complete, her focus is on creating a plan that addresses the massive use of the Park while fostering continued stewardship through a commitment to financial sustainability, operational excellence and engaged governance.

Previously, Ms. Smith served on the Conservancy’s Board of Trustees and the Advisory Board of the Institute for Urban Parks, the Conservancy’s educational arm; was a former NYC Parks Assistant Commissioner in the Bloomberg Administration; and also served as a Board Member of Friends of the High Line, the Open Space Institute, and as Vice Chair of New Yorkers for Parks. She is currently the Chair of the Board of Library of America, a not-for-profit publisher of significant American writing.

Prior to joining the Bloomberg Administration, Ms. Smith had a 25-year career in finance, starting in commercial banking at J.P. Morgan before transitioning to venture capital and private equity management at Prospect Group, Inc. and at the family offices of Harry F. Oppenheimer and the Rockefeller Financial Group. She later ran client services and finance at Sotheby’s.
